To: HR who may concern

Dear HR:

Howdy!

I am Yingtao Jiang, a senior majored in computer engineering from Texas A&M University. I am delightful that you open this letter and know more about me. This job is a best matched for me since I had experience in programming in embedded system, backend programming, and deep-learning research. I also minored in engineering project management, which improved my project management skills. I am looking for more professional experience in computer industry.

I am a passionate student in school, and I got to have lots of involvements. I am the former treasurer and an embedded system engineer in Robomaster Robotics Club. I love to code with my friends. I am now writing the backend code of reimbursement platform website. I learnt to use Flask, STM32, Travis CI, and Docker in these involvements. I started doing research in deep learning with Dr. Andrew Jiang. I also have quite a lot of experience in social activities. If you have interests, please have a look for my resume.

Hope you have a good day and good luck! Cannot wait for more communication with you.

Best Regards

Yingtao Jiang
